What are the challenges and opportunities in trans-Atlantic research collaboration and the development of a sustainable Atlantic aquaculture industry? Two H2020 projects AquaVitae and Astral will share experiences and best practices based on their research toward more sustainable aquaculture activities in the Belém Statement areas.

As a third aspect of this side event, the AANCHOR Joint Action: "Initiation toward a Brazilian Aquaculture Technology & Innovation Platform as a first step towards an All-Atlantic Aquaculture Platform" will be presented by EATiP – the European Aquaculture Technology & Innovation Platform.
